2016 Family Planning Write-Off:

Write-off of 2016 uncollectible outstanding balance for WCHD Men's and Women's Reproductive Health Services is \$10,172.15.

This amount is 4.39% of billing. In 2016 Dr. Pagnani passed, which caused a delay in billing, which ultimately resulted in denied claims due to untimely filing accounting for 3.97% of the total write-off.

No Journal Entry required. To be handled through December 2016 Reconciliation.

Additional Areas of Interest:

*A horse tested positive for rabies on a farm in the (T) Eagle. The farmer and another farm worker had administered oral medication to the horse during the late illness phases. These two received post exposure shots. The veterinarian who treated and prepared the brain for testing also received booster shot. Coincidentally, a day or two earlier, the same veterinarian attended to a Livingston County goat that also tested positive for rabies.

As part of the EPA's Long Term 2 (LT2) surface water treatment rule, the three Wyoming County surface water systems were required to perform additional sampling on the raw water source for a year beginning in fall of 2017. Based on the testing results the Villages of Attica and Warsaw are now required to perform advanced sampling for cryptosporidium in the raw water over the next year. Cryptosporidium testing is much more involved and will cost each Village approximately \$12,000 to complete. This department will continue to provide guidance and assist as needed to ensure compliance.

During the month of December, Rob Jines (PH Sanitarian) continued to provide Weights and Measures program oversight during the Director's Leave of Absence and along with Danni Hutson (PH Technician) assisted with site inspections as needed.

On December 27th retail tobacco sales compliance checks, with a minor, were completed at our retail tobacco establishments. A total of eighteen establishments were visited with no facilities selling cigarettes to a minor.

During the month of December, this office conducted our annual in-service to all of the Wyoming County OFA meal site locations. Departmental staff provided Environmental program updates and related news to the site attendees during the visit.

The **Genesee, Orleans, Wyoming and Niagara Counties Cancer Services Program** is a grant funded program providing access to free breast and cervical cancer screenings for uninsured women ages 40 – 64, and free colorectal cancer screenings for uninsured men and women ages 50 - 64. While the uninsured rate in Wyoming County is presently quite low, there are still many adults who, for a variety of reasons, remain without it. Therefore, the **Cancer Services Program** provides these individuals a peace of mind knowing they can at least obtain their cancer screenings.

Why should I be screened for cancer?

Breast, cervical and colorectal cancers may not always cause symptoms, but there are screening tests that can find these cancers early, when treatment is most successful.

The risk of breast cancer increases with age. Talk to your doctor about when and how often you should be screened.

All women are at risk for cervical cancer. Cervical cancer is one of the easiest cancers to prevent with regular screening tests and follow up. It is also highly curable when found and treated early.

All men and women ages 50 or older should be screened for colorectal cancer. If a member of your family has had colorectal cancer, your healthcare provider may recommend starting screening earlier.

Early cancer detection saves lives!

For more information or to enroll in the **Genesee, Orleans, Wyoming and Niagara Counties Cancer Services Program** call (716) 278-4898 and speak to Darlene.

Thank you for your kind attention to this vital information.
